CITYSCORE

CityScore is an initiative designed to inform the Mayor and city managers about the overall health of the City at a moment’s notice by aggregating key performance metrics into one number. Here we will provide you with an overview of the CityScore tool and data, but more importantly we will show you how we are using CityScore to make improvements across the City.

Datasets / Budget

On this page you can see the state of open data for Budget in all the places for which we have information.

Dataset Description

Municipal budget at a high level (e.g. planned budget by unit of appropriation with a programmatic description of each unit of appropriation). This category is about *budgets* which are *plans* for expenditure (not actual expenditure in the past). ([More info](#))

YouPin

YouPin

YouPin is an open platform for community reporting. The goal is to make highly efficient feedback loop between community and local government possible. YouPin is a tool to encourage residents to become active citizens in taking care of and improving their city. It provides single reporting channel for every kinds of non-emergency problems, regardless of local government agencies. The collected data will be trackable on the map view.
